ARMADA TWP. FIRE DEPARTMENT

What is the ISO rating program?

ISO collects information on municipal fire-protection efforts in communities throughout the United States. In each of those communities, ISO analyzes data such as response times, available water supply, man power, equipment, number of stations in comparison to response area, and the different types of apparatus. They then assign a Public Protection Classification from 1 to 10. Class 1 generally represents superior property fire protection, and Class 10 indicates that the area's fire-suppression program doesn't meet ISO's minimum criteria. This number rating system is used by insurance companies to determine rates charged to costumers based upon the community they live in.

Current Armada ISO Rating:

Our ISO rating is a class 4 in the Village of Armada and a class 6 in the Township of Armada. The township has a higher number because there are no fire hydrants in this area.
